

SYLLABUS FOR THE DEGREE OF BACHELOR OF ENGINEERING IN ENGINEERING SCIENCE [BEng(EngSc)]

The syllabus applies to students admitted in the academic year 2014-15 under the four-year curriculum.

Curriculum Structure

Candidates are required to complete not fewer than 240 credits in accordance with the regulations and syllabuses for the Bachelor of Engineering degree in Engineering Science. The curriculum structure of the Bachelor of Engineering degree in Engineering Science is as follows:

Course Categories	No. of credits
<u>UG5 Requirements</u>	
• English language enhancement courses	12
• Chinese language enhancement courses	6
• Common Core Curriculum Courses	36
<i>Sub-total</i>	54
<u>Major option in Engineering Science</u>	
• General Engineering Courses	18 to 24
• Discipline Introductory Courses	18 to 30
• Discipline Advanced Courses	12 to 30
• Capstone Experience	6 to 12
• Discipline Elective Courses	6 to 36
<i>Sub-total</i>	96
Elective Courses (including Discipline Elective Courses, Second Major/Minor option; Free Electives)	90
Total	240

Major Options

- Environmental Engineering
- Energy Engineering
- Materials Engineering
- Biomedical Engineering
- Computing & Data Analytics

Curriculum

The Curriculum comprises 240 credits of courses as follows:

General Engineering Courses

Students are required to complete 18 to 24 credits of General Engineering Course.

Discipline Core Courses

Students are required to complete ALL discipline core courses in accordance with the syllabuses of major option concerned (30 to 60 credits), comprising introductory core courses and advanced core courses.

Discipline Elective Courses

Students are required to complete 6 to 36 credits of discipline elective courses in accordance with the syllabuses of major option concerned.

Elective Courses

Students are required to complete at least 90 credits of elective course(s) offered by departments within or outside of the Faculty of Engineering.

University Requirements

Students are required to complete:

- a) 12 credits in English language enhancement, including 6 credits in “CAES1000 Core University English” and 6 credits in English-in-the-Discipline course of respective major option;
- b) 6 credits in Chinese language enhancement course “CENG9001 Practical Chinese for Engineering Students” and
- c) 36 credits of courses in the Common Core Curriculum, selecting not more than one course from the same Area of Inquiry within one academic year and at least one and no more than two courses from each Area of Inquiry during the whole period of study.

Capstone Experience

Students are required to complete 6-credit or 12-credit capstone experience course of respective major option to fulfill the capstone experience requirement for the degree of BEng in Engineering Science.

Internship

Students may enroll in the 6-credit internship of respective departments as discipline elective course subject to the approval of the Programme Director. The internship normally takes place after their third year of study.

Degree Classification

The degree of Bachelor of Engineering shall be awarded in five divisions in accordance with ES16 of the Regulations for the Degree of Bachelor of Engineering in Engineering Science and UG9 of the Regulations for the First Degree Curricula.

The details of the distribution of the above course categories are as follows:

The curriculum of BEng in Engineering Science degree comprises 240 credits of courses with the following structure:

A. Common Requirements for all major options in BEng in Engineering Science

UG 5 Requirements (54 credits)

Course Code	Course	No. of credits
CAES1000	Core University English	6
CAES95##	English in the Discipline course*	6
CENG9001	Practical Chinese for Engineering Students	6
CC##XXXX	University Common Core Course (6 courses)**	36
Total for UG5 Requirements		54

*English in the Discipline course of respective major options of BEng in Engineering Science curriculum is as follows:

Course Code	Course Title	Major option of BEng(EngSc)	Year/Semester
CAES9543	Technical English for Mechanical and Building Services Engineering	Materials Engineering	Semester 2, Year 4
CAES9531	Technical English for Medical Engineering	Biomedical Engineering	Semester 1, Year 3
CAES9540	Technical English for Civil Engineering	Environmental Engineering	Semester 1, Year 4
CAES9541	Technical English for Electrical and Electronic Engineering	Energy Engineering	Semester 2, Year 4
CAES9542	Technical English for Computer Science	Computing & Data Analytics	Semester 1, Year 4

** Students can select not more than one course from each Area of Inquiry within one academic year and at least one but no more than two courses from each Area of Inquiry during the whole period of study.

B. Specific Requirements for Individual Major Option of BEng in Engineering Science degree

1. Environmental Engineering

General Engineering Courses (24 credits)

Course Code	Course Title	No. of credits
MATH1851	Calculus and ordinary differential equations	6
MATH1853	Linear algebra, probability & statistics	6
ENGG1111/ ENGG1112	Computer programming and applications/ Computer programming and applications I	6
PHYS1050	Physics for engineering students	6
Total for General Engineering Courses		24

Discipline Core Courses (30 credits)

Introductory Courses (18 credits)

Course Code	Course Title	No. of credits
CIVL1105	Environmental engineering	6
CIVL2103	Fluid mechanics	6
ENGG1201	Engineering for sustainable development	6
Total for Introductory Discipline Core Courses		18

Advanced Courses (12 credits)

Course Code	Course Title	No. of credits
CIVL2104	Hydraulics and hydrology	6
MECH2407	Multivariable calculus & partial differential equations	6
Total for Advanced Discipline Core Courses		12

Capstone Experience (6 - 12 credits)

Course Code	Course Title	No. of credits
CIVL4101	Capstone design project	6
OR		
CIVL4102	Project	12
Total for Capstone Experience		6 - 12

Discipline Elective Courses (30 - 36 credits)

Course Code	Course Title	No. of credits
CIME2101	Water & air quality: concepts & measurements	6
CIVL3106	Engineering hydraulics	6
CIVL3107	Environmental impact assessment of civil engineering projects	6
CIVL3111	Wastewater treatment	6
CIVL3115	Solid and hazardous waste management	6
CIVL3121	Water Resources engineering	6
CIVL3122	Wind engineering	6
MECH3420	Air pollution control	6
MECH4428	Sound and vibration	6
Total for Discipline Elective Courses		30 - 36

Elective Courses (90 credits)

At least 90 credits of elective course(s) offered by departments within or outside the Faculty of Engineering.

Note: Students can take Research Postgraduate courses as discipline elective course subject to the approval of the Programme Director.

Reference Table for BEng in Engineering Science (Environmental Engineering)

Year	Language	Common Core	General Engineering/ Core/Capstone Experience	Discipline Electives	Elective Courses	Total
1	6	24	30	0	0	60
2	0	12	18	12	18	60
3	12	0	12 - 18	18 - 24	12	60
4	0	0	0	0	60	60
Total	18	36	60 - 66	30 - 36	90	240

2. Energy Engineering

General Engineering Courses (24 credits)

Course Code	Course Title	No. of credits
MATH1851	Calculus and ordinary differential equations	6
MATH1853	Linear algebra, probability & statistics	6
ENGG1111	Computer programming and applications	6
PHYS1050	Physics for engineering students	6
Total for General Engineering Courses		24

Discipline Core Courses (54 credits)**Introductory Courses (24 credits)**

Course Code	Course Title	No. of credits
ENGG1203	Introduction to electrical and electronic engineering	6
ELEC2147	Electrical energy technology	6
ELEC2346	Electric circuit theory	6
ELEC2441	Computer organization and microprocessor	6
Total for Introductory Discipline Core Courses		24

Advanced Courses (30 credits)

Course Code	Course Title	No. of credits
ELEC3141	Power transmission and distribution	6
ELEC3142	Electrical energy conversion	6
ELEC3143	Power electronics	6
MECH2407	Multivariable calculus & partial differential equations	6
MECH3402	Engineering thermodynamics	6
Total for Advanced Discipline Core Courses		30

Capstone Experience (6 – 12 credits)

Course Code	Course Title	No. of credits
ELEC3848	Integrated design project	6
OR		
ELEC4848	Senior design project	12
Total for Capstone Experience		6 - 12

Discipline Elective Courses (6 - 12 credits)

Course Code	Course Title	No. of credits
ELEC2242	Introduction to electromagnetic waves and fields	6
ELEC3241	Signal and linear systems	6
ELEC3844	Engineering management and society	6
ELEC4141	Electric railway systems	6
ELEC4142	Power system protection and switchgear	6
ELEC4144	Electric vehicle technology	6
ELEC4145	Building services – electrical services	6
ELEC4146	Building services – electrical installations	6
ELEC4147	Power system analysis and control	6
MECH3418	Dynamics and control	6
MECH4409	Energy conversion systems	6
MECH4411	Heat transfer	6
MECH4423	Building energy management and control systems	6
Total for Discipline Elective Courses		6 - 12

Elective Courses (90 credits)

At least 90 credits of elective course(s) offered by departments within or outside the Faculty of Engineering.

Note: Students can take Research Postgraduate courses as discipline elective course subject to the approval of the Programme Director.

Reference Table for BEng in Engineering Science (Energy Engineering)

Year	Language	Common Core	General Engineering/ Core/Capstone Experience	Discipline Electives	Elective Courses	Total
1	6	24	30	0	0	60
2	0	12	24	0	24	60
3	12	0	30 - 36	6 - 12	6	60
4	0	0	0	0	60	60
Total	18	36	84 - 90	6 - 12	90	240

3. Materials Engineering

General Engineering Courses (24 credits)

Course Code	Course Title	No. of credits
MATH1851	Calculus and ordinary differential equations	6
MATH1853	Linear algebra, probability & statistics	6
ENGG1111/ ENGG1112	Computer programming and applications/ Computer programming and applications I	6
PHYS1050	Physics for engineering students	6
Total for General Engineering Courses		24

Discipline Core Courses (54 credits)

Introductory Courses (30 credits)

Course Code	Course Title	No. of credits
ENGG1205	Introduction to mechanical engineering	6
MECH2404	Drawing and elements of design and manufacture	6
MECH2413	Engineering mechanics	6
MECH2419	Properties of materials	6
ELEC2242	Introduction to electromagnetic waves and field	6
Total for Introductory Discipline Core Courses		30

Advanced Courses (24 credits)

Course Code	Course Title	No. of credits
ELEC3347	Electronic materials and quantum physics	6
ELEC4248	Photonic systems technologies	6
MECH4414	Materials for engineering applications	6
MEDE3600	Biomaterials I	6
Total for Advanced Discipline Core Courses		24

Capstone Experience (6 - 12 credits)

Course Code	Course Title	No. of credits
-------------	--------------	----------------

MECH3427	Design and manufacture	6
OR		
MECH4429	Integrated capstone experience	12
Total for Capstone Experience Courses		6 - 12

Discipline Elective Courses (6 - 12 credits)

Course Code	Course Title	No. of credits
IMSE3106	Manufacturing technology	6
IMSE4129	Manufacturing system analysis and design	6
MECH3409	Mechanics of solids	6
MECH3416	Fundamentals of aeronautical engineering	6
MECH4412	Product design and development	6
MECH4415	Applied stress and strength analysis	6
MECH4467	Microsystems for energy, biomedical and consumer electronics applications	6
MEDE4500	Biomedical instrumentation and systems	6
Total for Discipline Elective Courses		6 - 12

Elective Courses (90 credits)

At least 90 credits of elective course(s) offered by departments within or outside the Faculty of Engineering.

Note: Students can take Research Postgraduate courses as discipline elective course subject to the approval of the Programme Director.

Reference Table for BEng in Engineering Science (Materials Engineering)

Year	Language	Common Core	General Engineering/ Core/Capstone Experience	Discipline Electives	Elective Courses	Total
1	6	24	30	0	0	60
2	0	12	24	0	24	60
3	12	0	30 - 36	6 - 12	6	60
4	0	0	0	0	60	60
Total	18	36	84 - 90	6 - 12	90	240

4. Biomedical Engineering

General Engineering Courses (24 credits)

Course Code	Course Title	No. of credits
MATH1851	Calculus and ordinary differential equations	6
MATH1853	Linear algebra, probability & statistics	6
ENGG1111/ ENGG1112	Computer programming and applications/ Computer programming and applications I	6
PHYS1050	Physics for engineering students	6
Total for General Engineering Courses		24

Discipline Core Courses (42 credits)*Introductory Courses (30 credits)*

Course Code	Course Title	No. of credits
ENGG1203	Introduction to electrical and electronic engineering	6
ENGG1205	Introduction to mechanical engineering	6
ENGG1206	Introduction to biomedical engineering	6
ENGG1207	Foundations of biochemistry for medical engineering	6
MEDE2301	Life sciences I (Biochemistry)	6
Total for Introductory Discipline Core Courses		30

Advanced Courses (12 credits)

Course Code	Course Title	No. of credits
MEDE2302	Life sciences II (Cell Biology & Physiology)	6
MEDE3301	Life sciences III (Physiology)	6
Total for Advanced Discipline Core Courses		12

Capstone Experience (6 - 12 credits)

Course Code	Course Title	No. of credits
MEDE3010	Integrated Project	6
OR		
MEDE4010	Final year project	12
Total for Capstone Experience		6 - 12

Discipline Elective Courses (18 - 24 credits)

Course Code	Course Title	No. of credits
MEDE3500	Electromagnetics in biomedicine	6
MEDE3501	Medical imaging	6
MEDE4500	Biomedical instrumentation and systems	6
MEDE4501	Biophotonics	6
MEDE3600	Biomaterials I	6
MEDE3602	Thermofluids for medical engineering	6
MEDE4602	Molecular and cellular biomechanics	6
MEDE4603	Transport phenomena in biological systems	6
MEDE4604	Cell and tissue engineering	6
ELEC4242	Robotics	6
Total for Discipline Elective Courses		18 - 24

Elective Courses (90 credits)

At least 90 credits of elective course(s) offered by departments within or outside the Faculty of Engineering.

Note: Students can take Research Postgraduate courses as discipline elective course subject to the approval of the Programme Director.

Reference Table for BEng in Engineering Science (Biomedical Engineering)

Year	Language	Common Core	General Engineering/ Core/Capstone Experience	Discipline Electives	Elective Courses	Total
1	6	18	36	0	0	60
2	0	18	24	0	18	60
3	12	0	12 - 18	18 - 24	12	60
4	0	0	0	0	60	60
Total	18	36	72 - 78	18 - 24	90	240

5. Computing & Data Analytics

General Engineering Courses (18 credits)

Course Code	Course Title	No. of credits
COMP2121	Discrete mathematics	6
ENGG1111	Computer programming and applications	6
MATH1013	University mathematics II*	6
Total for General Engineering Courses		18

*Students can be waived for taking “MATH1013 University mathematics II” should they completed “MATH1851 Calculus and ordinary differential equations” and “MATH1853 Linear algebra, probability & statistics”.

Pre-requisite for “MATH1013 University mathematics II”:

- Level 2 or above in HKDSE Mathematics plus Extended Module 1; or
- Level 2 or above in HKDSE Mathematics plus Extended Module 2; or
- Completed “MATH1011 University mathematics I”

Discipline Core Courses (54 credits)

Introductory Courses (30 credits)

Course Code	Course Title	No. of credits
COMP2119	Introduction to data structures and algorithms	6
COMP2123	Programming technologies and tools	6
MATH2014	Multivariable calculus and linear algebra	6
STAT2601	Probability and statistics I	6
STAT2602	Probability and statistics II	6
Total for Introductory Discipline Core Courses		30

Advanced Courses (24 credits)

Course Code	Course Title	No. of credits
COMP3250	Design and analysis of algorithms	6
COMP3278	Introduction to database management systems	6
COMP3407	Scientific computing	6
STAT3600	Linear statistical analysis	6
Total for Advanced Discipline Core Courses		24

Capstone Experience (6 - 12 credits)

Course Code	Course Title	No. of credits
COMP4804	Computing and data analytics project	6
OR		
COMP4801	Final year project *	12
Total for Capstone Experience		6 - 12

* The project must be related to Computing and Data Analytics.

Discipline Elective Courses (12 - 18 credits)

Course Code	Course Title	No. of credits
STAT3609	The statistics of investment risk	6
STAT3611	Computer-aided data analysis	6
STAT3612	Data mining	6
STAT3613	Marketing engineering	6
STAT3615	Practical mathematics for investment	6
STAT3618	Derivatives and risk management	6
STAT4601	Time series analysis	6
STAT4607	Credit risk analysis	6
STAT4608	Market risk analysis	6
Total for Discipline Elective Courses		12 - 18

Elective Courses (90 credits)

At least 90 credits of elective course(s) offered by departments within or outside the Faculty of Engineering.

Note: Students can take Research Postgraduate courses as discipline elective course subject to the approval of the Programme Director.

Reference Table for BEng in Engineering Science (Computing and data analytics)

COURSE DESCRIPTIONS

Candidates will be required to do the coursework in the respective courses selected. Not all courses are offered every semester.

General Engineering Courses

ENGG1111	Computer programming (6 credits) or
ENGG1112	Computer programming I (6 credits)
MATH1851	Calculus and ordinary differential equations (6 credits)
MATH1853	Linear algebra, probability & statistics (6 credits)
PHYS1050	Physics for engineering students (6 credits)
ENGG1201	Engineering for sustainable development (6 credits)
ENGG1202	Foundation of computer science (6 credits)
ENGG1203	Introduction to electrical and electronic engineering (6 credits)
ENGG1205	Introduction to mechanical engineering (6 credits)
ENGG1206	Introduction to biomedical engineering (6 credits)
ENGG1207	Foundations of biochemistry for medical engineering (6 credits)

Please refer to the General Engineering Courses in the syllabus for the degree of BEng for details.

University Requirements on Language Enhancement Courses

All the students admitted to the Bachelor of Engineering in Engineering Science curriculum are required to take two English language enhancement courses and one Chinese language enhancement course in the study year as specified in the syllabuses:

CAES1000.	Core University English
CENG9001.	Practical Chinese for engineering students (to be taken at the first semester of third year of study)

Please refer to the University Language Enhancement Courses in the syllabus for the degree of BEng for details.

CAES95##.	English in the Discipline course for respective BEng curriculum and BEng(EngSc) major option
-----------	----------------------------------------------------------------------------------------------

CAES9543. Technical English for Mechanical and Building Services Engineering (6 credits)

This 6-credit English-in-the-Discipline course will introduce ME/ BSE and BEng(EngSc) Materials Engineering students to professional and technical communication in the context of technical project report writing and oral presentation. The course will provide an intensive English environment and engage students in activities which help them prepare for the completion of the assessments required by their capstone experience courses. Assessment is wholly by coursework.

Co-requisites: MECH4429 Integrated capstone experience OR
MECH3427 Design and manufacture (for BEng(EngSc) Materials Engineering students only)

Assessment: 100% continuous assessment

CAES9531. Technical English for Medical Engineering (6 credits)

This English in the Discipline course aims to develop Medical Engineering and students' ability to write and speak in their discipline. The course will focus on developing students' ability to write a technical report and give a technical presentation on a medical device they have developed. The English course will run alongside the Medical Engineering Integrated Project course (MEDE3010). This course requires students to develop a portable medical device, such as electrocardiogram (ECG) recording device or pulse oximeter, from scratch, use the device to gain data, and use the obtained data to gain insights into human physiology. The students then need to write a report and give a presentation which explains a mixture of medical and engineering information. This English course will focus on the English language skills needed to complete these assignments. Students will be assessed using the report and the presentation they produce for the Medical Engineering course as well as a final written test and an out of class learning component.

Co-requisite: MEDE3010 Integrated project

Assessment: 100% continuous assessment

CAES9540. Technical English for Civil Engineering (6 credits)

This one semester 6-credit English course will be offered to final year Civil Engineering and BEng(EngSc) Environmental Engineering students. It will run alongside Civil Engineering core project courses. The main course objective is to provide students with training on report writing and oral presentation skills. Students will learn to write a technical report in a professional and effective manner through drafting and revision of their work. They will also be trained to give a technical presentation that focuses on explaining technical information to the general audience, handling over in a group presentation and designing appropriate visual aids to both professional and non-expert audiences. Assessment is by coursework and a final test.

Co-requisite: CIVL4102 Project OR
CIVL4101 Capstone design project (for BEng(EngSc) Environmental Engineering students only)

Assessment: 100% continuous assessment

CAES9541. Technical English for Electrical and Electronic Engineering (6 credits)

Running alongside the Design Projects, this one-semester, 6-credit course will build and consolidate final year BEng(EI) and BEng(EngSc) Energy Engineering students' ability to compose technical reports and technical papers, and make technical oral presentations. The focus of this course is on helping students to present the findings of their Technical Project in an effective, professional manner in both written and oral communication. Topics include accessing, abstracting, analyzing, organizing and summarizing information; making effective grammatical and lexical choices; technical report/paper writing; and technical presentations. Assessment is wholly by coursework.

Co-requisite: ELEC4848 Senior design project OR
ELEC3848 Integrated design project (for BEng(EngSc) Energy Engineering students only)

Assessment: 100% continuous assessment

CAES9542. Technical English for Computer Science (6 credits)

Running alongside Computer Science project based courses, this one-semester, 6-credit course will build and consolidate final year CS and BEng(EngSc) Computing and Data Analytics students' ability to compose technical reports, and make technical oral presentations. The focus of this course is on helping students to report on the progress of their Final Year Project in an effective, professional manner in both written and oral communication. Topics include accessing, abstracting, analyzing, organizing and summarizing information; making effective grammatical and lexical choices; technical report writing; and technical presentations. Assessment is wholly by coursework.

Co-requisite: COMP4801 Final year project OR
COMP4804 Computing and data analytics project (for BEng(EngSc) Computing and data analytics students only)

Assessment: 100% continuous assessment

University Common Core Curriculum

36 credits of courses in the University Common Core Curriculum, in which students can select not more than one course from each Area of Inquiry within one academic year and at least one but no more than two courses from each Area of Inquiry during the whole period of study:

- Scientific and Technology Literacy
 - Humanities
 - Global Issues
 - China: Culture, State and Society
-

Discipline Core/Discipline Elective/Capstone Experience Courses

CIME2101. Water and air quality: concepts and measurement
CIVL1105. Environmental engineering (6 credits)
CIVL2103. Fluid mechanics (6 credits)
CIVL2104. Hydraulics and hydrology (6 credits)
CIVL3106. Engineering hydraulics (6 credits)
CIVL3107. Environmental impact assessment of civil engineering projects (6 credits)
CIVL3111. Wastewater treatment (6 credits)

- CIVL3115. Solid and hazardous waste management (6 credits)**
- CIVL3121. Water resources engineering (6 credits)**
- CIVL3122. Wind engineering (6 credits)**
- CIVL4101. Capstone Design Project (6 credits)**
- CIVL4102. Project (12 credits)**

Please refer to the syllabus of the Civil Engineering programme for course description.

- COMP2119. Introduction to data structures and algorithms (6 credits)**
- COMP2121. Discrete mathematics (6 credits)**
- COMP2123. Programming Technologies and tools (6 credits)**
- COMP3250. Design and analysis of algorithms (6 credits)**
- COMP3278. Introduction to database management systems (6 credits)**
- COMP3407. Scientific computing (6 credits)**
- COMP4801. Final year project (12 credits)**
- COMP4804. Computing and Data Analytics Project (6-credits)**

Please refer to the syllabus of the Computer Science programme for course description.

- ELEC2147. Electrical energy technology (6 credits)**
- ELEC2242. Introduction to electromagnetic waves and fields (6 credits)**
- ELEC2346. Electric circuit theory (6 credits)**
- ELEC2441. Computer organization and microprocessors (6 credits)**
- ELEC3141. Power transmission and distribution (6 credits)**
- ELEC3142. Electric energy conversion (6 credits)**
- ELEC3143. Power electronics (6 credits)**
- ELEC3241. Signals and linear systems (6 credits)**
- ELEC3347. Electronic materials and quantum physics (6 credits)**
- ELEC3844. Engineering management and society (6 credits)**
- ELEC3848. Integrated design project (6 credits)**
- ELEC4141. Electric railway systems (6 credits)**
- ELEC4142. Power system protection and switchgear (6 credits)**
- ELEC4144. Electric vehicle technology (6 credits)**
- ELEC4145. Building services- electrical services (6 credits)**
- ELEC4146. Building services- electrical installations (6 credits)**
- ELEC4147. Power system analysis and control (6 credits)**
- ELEC4242. Robotics (6 credits)**
- ELEC4248. Photonic systems technologies (6 credits)**
- ELEC4848. Senior design project (12 credits)**

Please refer to the syllabus of the Computer Engineering/Electrical Engineering/Electronic Engineering programme for course description.

- IMSE3106. Manufacturing technology (6 credits)**
- IMSE4129. Manufacturing system analysis and design (6 credits)**

Please refer to the syllabus of the Industrial Engineering and Technology Management/Logistic Engineering and Supply Chain Management programme for course description.

- MECH2404. Drawing and elements of design and manufacture (6 credits)**
- MECH2407. Multivariable calculus & partial differential equations (6 credits)**
- MECH2413. Engineering Mechanics (6 credits)**
- MECH2419. Properties of materials (6 credits)**
- MECH3402. Engineering thermodynamics (6 credits)**
- MECH3409. Mechanics of solids (6 credits)**
- MECH3416. Fundamentals of aeronautical engineering (6 credits)**
- MECH3418. Dynamics and control (6 credits)**
- MECH3420. Air pollution control (6 credits)**
- MECH3427. Design and manufacture (6 credits)**
- MECH4409. Energy conversion systems (6 credits)**
- MECH4411. Heat transfer (6 credits)**
- MECH4412. Product design and development (6 credits)**
- MECH4414. Materials for engineering applications (6 credits)**
- MECH4415. Applied stress and strength analysis (6 credits)**
- MECH4423. Building energy management and control systems (6 credits)**
- MECH4428. Sound and vibration (6 credits)**
- MECH4429. Integrated capstone experience (12 credits)**
- MECH4467. Microsystem for energy, biomedical and consumer electronics applications (6 credits)**

Please refer to the syllabus of the Industrial Engineering and Technology Management/Logistic Engineering and Supply Chain Management programme for course description.

- MEDE2301. Life sciences I (Biochemistry) (6 credits)**
- MEDE2302. Life sciences II (Cell Biology & Physiology) (6 credits)**
- MEDE3010. Integrated project (6 credits)**
- MEDE3301. Life sciences III (Physiology) (6 credits)**
- MEDE3500. Electromagnetics in biomedicine (6 credits)**
- MEDE3501. Medical imaging (6 credits)**
- MEDE4010. Final year project (12 credits)**
- MEDE4500. Biomedical instrumentation and systems (6 credits)**
- MEDE4501. Biophotonics (6 credits)**
- MEDE3600. Biomaterials I (6 credits)**
- MEDE3602. Thermofluids for medical engineering (6 credits)**
- MEDE4602. Molecular and cellular biomechanics (6 credits)**
- MEDE4603. Transport phenomena in biological systems (6 credits)**
- MEDE4604. Cell and tissue engineering (6 credits)**

Please refer to the syllabus of the Medical Engineering programme for course description.

- MATH1013. University mathematics II (6 credits)**
- MATH2014. Multivariable calculus and linear algebra (6 credits)**
- STAT2601. Probability and statistics I (6 credits)**
- STAT2602. Probability and statistics II (6 credits)**
- STAT3600. Linear statistical analysis (6 credits)**
- STAT3609. The statistics of investment risk (6 credits)**
- STAT3611. Computer-aided data analysis (6 credits)**
- STAT3612. Data mining (6 credits)**
- STAT3613. Marketing engineering (6 credits)**
- STAT3615. Practical mathematics for investment (6 credits)**
- STAT3618. Derivatives and risk management (6 credits)**

- STAT4601. Time-series analysis (6 credits)**
- STAT4607. Credit risk analysis (6 credits)**
- STAT4608. Market risk analysis (6 credits)**

Please refer to the syllabus for the degree of BSc for course description.
